

CBM

Gesellschaft für Consulting, Business und Management mbH

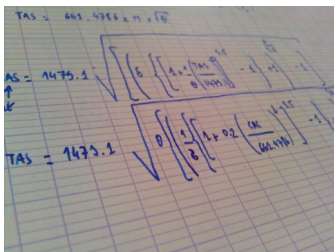

Our focus: People!

As man is the origin of every activity, people are the center of all our efforts. They are the warrantors of a company's success.

With their skills and their knowledge employees are the precondition for linking technology and process or organisation respectively.

Far beyond of being just a source of output, man is simply too precious to set his life at risk or not to make use of his capabilities.

Our team: Multi-purpose

We are a team of ambitious engineers and scientists with longtime experience in mining and industry solving your problems in an holistic practice oriented approach. Aiming to efficiency improvement in

- mine development & production,
- mine safety and
- mine ventilation.

Our results: Small scale, long range

Our results aim on creating safe, healthy and – at the same time – competitive workplaces by

- consultancy and implementation,
- instruction and training,
- research and development.

With emphasis on technical and economical consulting in mining engineering and heavy industry we work on company and human resources development in the broadest sense but always with the sense for detailed tailor-made solutions.

Our common achievements Your success!
