

CBM is an engineering company with a broadly diversified knowledge in mining engineering.

We provide widespread comprehensive consulting services around all phases of a mine's life cycle on the fields of technology, economy, safety, environmental issues and the related domains.

Our consultants themselves dispose of long-lasting experience from management positions in the mining industry.

Our Focus

Our focus is technical and organizational consulting in Mining and Industry in the fields of

- Operation processes,
- Occupational safety and
- Training.

Our Working Method

Our approach is to work process sustaining as a „classic“ consultant in the broader context. We accomplish this customer- and location-oriented and always with the goal to find the optimum tailor made solution. Our vision is to be your guide towards your organization's success.

Results

We are aiming towards both safe and healthy and therefore competitive jobs by

- Consultancy and implementation,
- Education and training,
- Research and development.
